# 2009 Fruit Tree Catalogue

## CONDITIONS OF SALE

Every possible precaution is taken to prevent errors and ensure that our trees are true to name and label. It is therefore our terms of contract for the sale of trees that in the event of trees being found untrue to name or label, we will be liable only to refund the purchase price or replace the trees.

No liability is to attach to us where pests, drought or other causes beyond our control, prevent delivery of stock that may be contracted for.

Prices are subject to alteration without notice.

## **DEPOSIT REQUIRED - 10% of TOTAL ORDER**

### **PLEASE NOTE**

Due to demands on limited space, all orders **MUST** be collected by 31 July, unless by prior arrangement.

Any orders remaining after that date may be returned to general stock.

### **JAPANESE PLUMS**

Mariposa: Santa Rosa, Satsuma.

Santa Rosa: Satsuma, Mariposa.

Satsuma: Santa Rosa.

We have an extensive range of free fact sheets available, listing detailed information on all varieties of fruit trees.

## Winter Spray Information for Fruit Trees

### **APPLES:**

No spray necessary until it reaches fruiting stage. Spray with Kocide before flowering to combat Apple Scab.

### **APRICOTS:**

No spraying necessary until fruiting stage. To counter Brown Rot, spray with Mancozeb at blossom time.

### **CHERRIES, PEARS & PLUMS:**

No spraying necessary. May need spraying in November/December to combat Pear Slug. Spray with Confidor.

### **PEACHES & NECTARINES:**

To counteract Leaf Curl, spray every winter from time of purchase. Spray when the tree is planted, you MUST then spray again at blossom time (at pink tip stage). Spray with Kocide.

Once the fruiting stage has been reached, Brown Rot can be a problem. Counteract this by spraying with Mancozeb regularly from blossom time until the dead blossoms drop.
